

tacit knowledge os
for kashmiri heritage artisans

hunarmand

we treat what the master never wrote down
as captureable, queryable, ownable infrastructure.

talim, kanihama,
c. 1820. the script
the master kept.

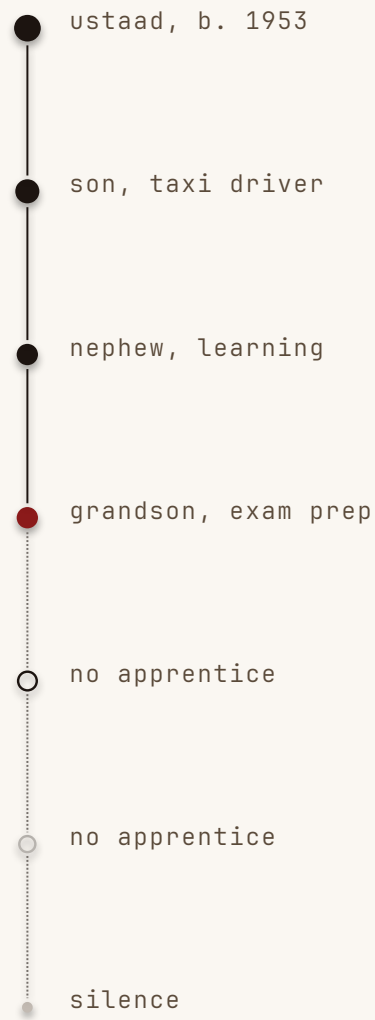

bitwise

srinagar · 2026 · v 0.1 hackathon build

neon pgvector · hf spaces · render · vercel

hunarmand

01 / 06

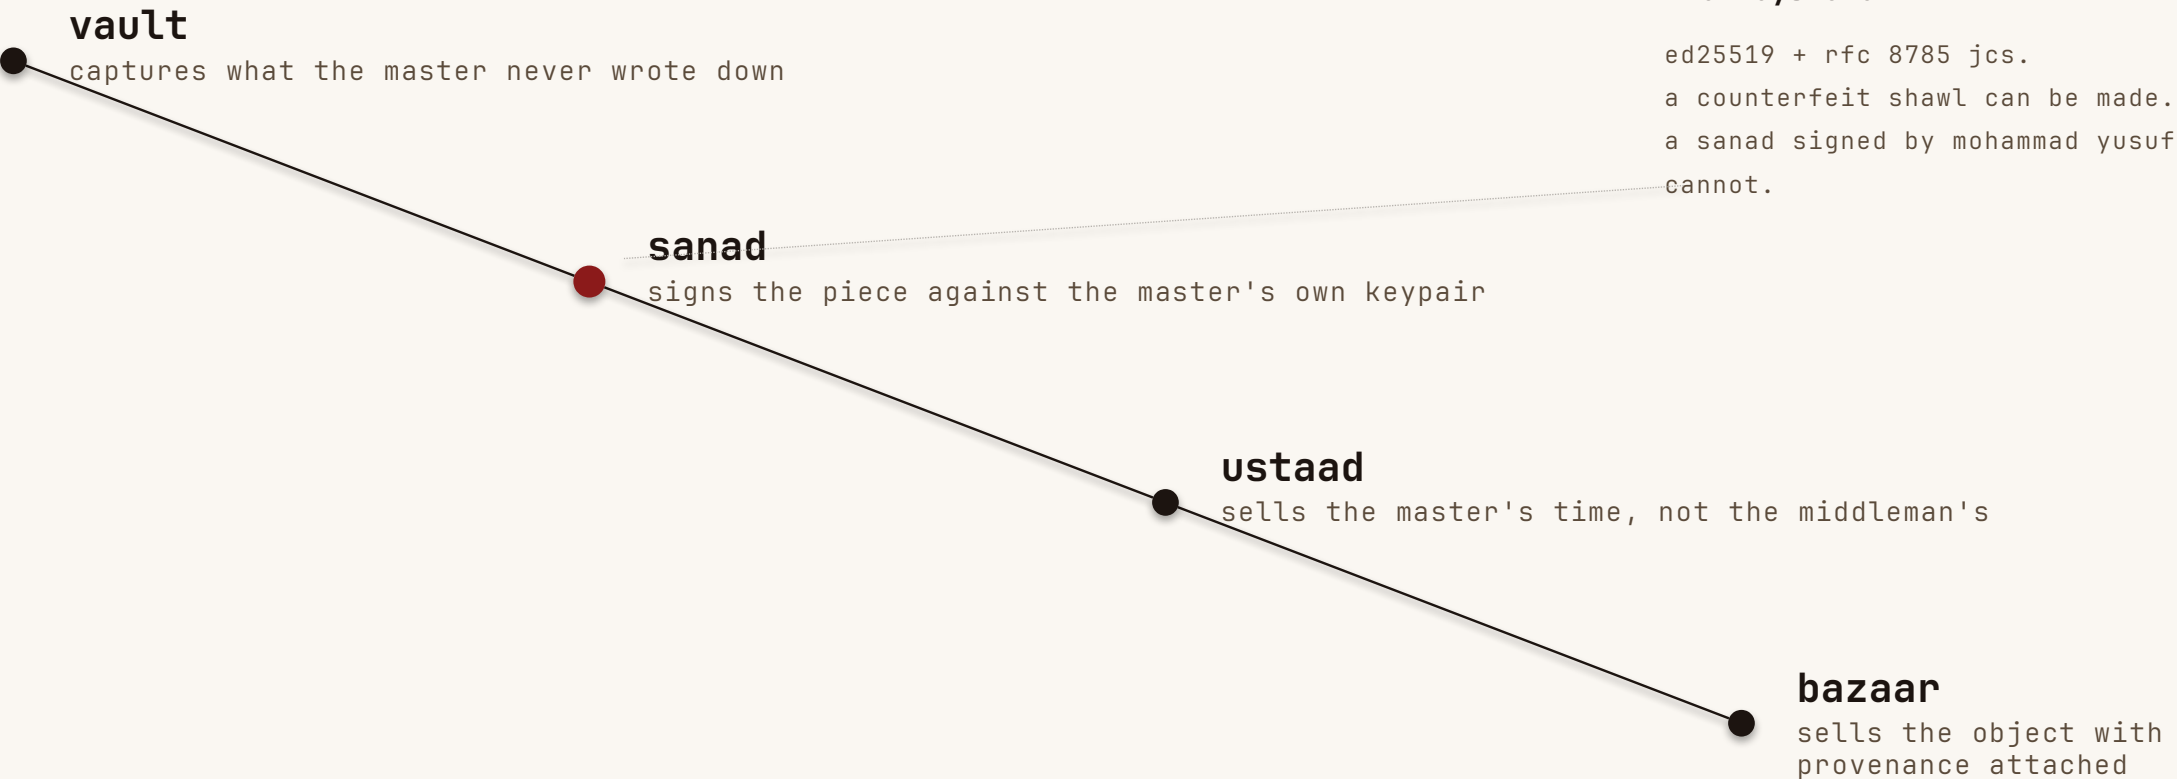

12 yrs

median time a kashmiri craft survives without an apprentice

talking to ten thousand workshops in the valley
is not a sentimental project. it is a deadline.

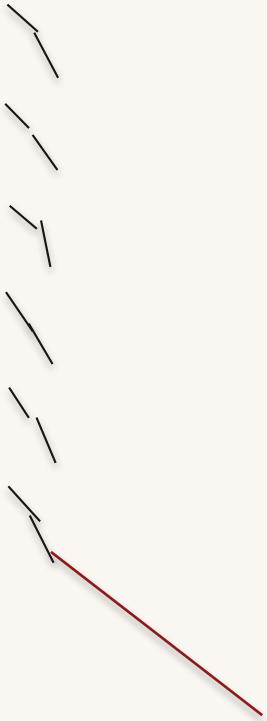

solution / four interlocking layers, anchored on cryptographic provenance

methodology / how tacit knowledge becomes infrastructure

talim, kanihama, c. 1820

twelve hours of speech.

four hundred fields.

one signed artefact.

the master's tacit knowledge,
structured under their own keypair,
owned by the master in perpetuity.

01

session

master in own workshop, interview led in koshur

02

transcribe

bhashini > ai4bharat > groq > whisper, ladder

03

extract

multi-pass llm, strict json schema, repair loop

04

sign

ed25519 over rfc 8785 jcs, one keypair per master

05

index

pgvector embeddings, public api in under a second

technology / deployed today, free tier, queryable now

frontend	• next.js 16 • vercel • hunarmand.sal.lol
backend	• fastapi • render • alembic on every deploy
ai core	• fastapi • hugging face spaces • ed25519 sanad service
postgres	• neon • pgvector • shared between backend + ai core
asr	• bhashini > ai4bharat > groq > hf inference > whisper
llm	• openrouter • free + premium models behind one interface
embeddings	• sentence-transformers • intfloat / multilingual-e5-small
signature	• ed25519 over rfc 8785 jcs • jws-compact qr • offline verify

every dependency above is on a free tier today.

18

seeded
artisan masters

54

bookable
workshops

2.8s

median latency,
sign + persist

● every number is queryable from the public api right now.

we are not bringing foreign technology to kashmir.
we are upgrading what kashmir already invented.
