

tacit knowledge os
for kashmiri heritage artisans

hunarmand

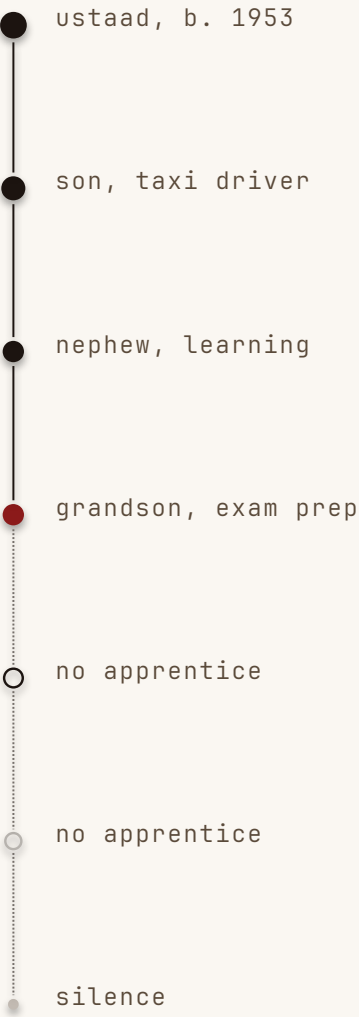

we treat what the master never wrote down
as captureable, queryable, ownable infrastructure.

talim, kanihama,
c. 1820. the script
the master kept.

12 yrs

median time a kashmiri craft survives without an apprentice

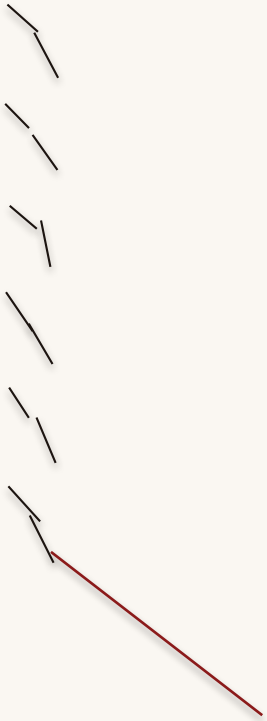

talking to ten thousand workshops in the valley
is not a sentimental project. it is a deadline.

solution / four interlocking layers, anchored on cryptographic provenance

what we offer / four layers, one tacit knowledge spine
talim, kanihama, c. 1820

**one tacit knowledge spine.
four ways for the master
to make a living from it.**

what kashmir invented in the loom
we gave a database, a key, a marketplace,
and a calendar.

01

vault

ai-led capture · craft dna · transcript replay
for the artisan

02

sanad

ed25519 provenance · scan-to-verify qr · public registry
for the buyer

03

ustaad

workshop calendar · otp booking · seasonal availability
for the learner

04

bazaar

curated bundles · checkout · order tracking
for the collector

asr	• bhashini > ai4bharat > groq > whisper, with auto-fallback
llm	• openrouter aggregation, provider-agnostic structured output
extraction	• multi-pass interview, strict json schema, repair loop
embeddings	• sentence-transformers, multilingual-e5-small, 384-dim
retrieval	• pgvector cosine over chunked, timestamped transcripts
signature	• ed25519 over rfc 8785 jcs, jws-compact qr, offline verify
storage	• neon postgres, async sqlalchemy, alembic-managed schema

every provider has a fallback. every signature verifies offline.

we are not bringing foreign technology to kashmir.
we are upgrading what kashmir already invented.
